1) Tree Biology and Utility Pruning 101 – Randall Miller

This presentation reviews Tree Biology fundamentals, explains how they can be properly applied to pruning trees and why that is advantageous for providing clearance between trees and power lines.

2) Integrated Vegetation Management – Randall Miller

This presentation reviews the principles of integrated vegetation management and how they can be used to create areas of opportunity to promote early successional habitat on linear corridors while effectively maintaining critical infrastructure like transmission lines.

Presenter Bio –

Randall Miller is Director of Research and Development Eocene Environmental Group. He brings more than three decades of Utility Vegetation Management experience, previously working as director of vegetation management for PacifiCorp. He served on the ISA Board of Directors, and has been chair of the TREE Fund Board of Trustees, and President of the UAA. He is author of the ISA Integrated Vegetation Management Best Management Practices, and is co-author, with Geoff Kempter, of the Utility Specialist Certification Study Guide.
